We are members of
Flowers from the Farm

Working with seasonal flowers, our cutting garden provides the perfect partner for turning your event and wedding vision into reality, these are used along with flowers sourced from our trusted local suppliers.

We are fortunate to have space to grow and care for a range of foliage and flowers that will become part of your special occasion.

At the Solent Flower Patch, nature works in harmony! Alongside our beautiful blooms, we have hives of honey bees and care for a number of ex-commercial hens who live out their retirement with us, creating a sustainable ecosystem.

The bees tirelessly pollinate our flowers, while our happy hens contribute nutrient-rich waste to our compost bins. We compost all our green waste, returning it to the soil to enrich our plant beds naturally.

Every flower grown here is nurtured by the love of our animals and our commitment to sustainability.
